

THE MINT OF THE UNITED STATES AT SAN FRANCISCO,
SUPERINTENDENT'S OFFICE.

June 13, 1910.

Director of the Mint,

Washington, D. C.

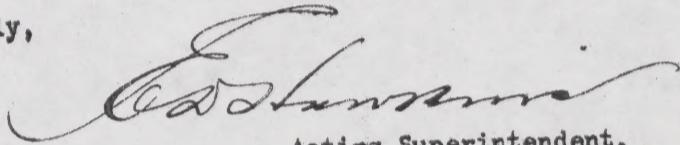

Sir:

Your letter of the 4th instant, in relation to obtaining from the Society of California Pioneers permission to make a cast of the fifty-dollar slug now in the possession of this Mint, received.

I took the matter up with the officers of the society, and have just received word that the president and board of directors have decided not to grant the permission desired.

Their representative stated that owing to the rarity of the specimen the society did not wish to have a cast of it in existence.

Respectfully,

Ed Lanson
Acting Superintendent.

MINT OF THE UNITED STATES AT SAN FRANCISCO,

SUPERINTENDENT'S OFFICE

April 14, 1906.

Hon. Geo. E. Roberts,
Washington, D. C.

My Dear Mr. Roberts:

I suppose I will have to go to Seattle on about the 1st prox., to appear before the grand jury in the Adams' case, consequently I wish you would provide me with the railroad requisition for transportation and Pullman accomodation. I have written to Mr. Kerfoot to consult with Mr. Frey and see if he can get along without me, and if so, why the requisition will be good later on when it will be necessary for me to go up there to attend the trial.

You will remember that some weeks ago I suggested that a more careful tracing be made of the Parmalee signature on the books of the New York Assay Office, which tracing I should like to have. Possibly that letter went to the Bureau during your absence in Iowa.

With kind regards, I am,

Yours truly,

To

Geo.E.Roberts,
Director Mint
Washn D.C.

San Francisco visited early this morning by terrible earthquake followed by fire which has burned the greater part of business district. Mint building not damaged much by shock but the big stacks were badly shaken and may have to come down but not sure about it now. Every building around the entire mint buirned to the ground. It is only building not destroyed for blocks. I reached building before the worst of the fire came, finding a lot our men then stationed them at points of vantage from ~~roo~~^{and half} basement and withour fire apparatus. A drop from fire department we successfully fought the fire away, although all the windows on mint ave and back side third story were burned out , fire coming in drove us back for a time. Adjusting rooms and refinery damage some, and the heavy stone cornice on that

As feared the balance of the business part of city was destroyed last night the fire is now raging in the western residence district was destroyed yesterday and last night. One whole street is being disinfected access path of fire. The mint building safe one side scaled by heat but interior is intact. It is the only building in path of fire south of market not destroyed except new post office, partially burned. Apprehend no further trouble from fire have to send messages to Oakland to forward.

April 22, 1906

Hon. Geo. E. Roberts,
Director of the Mint,
Washington, D. C.

Sir:

The terrible disaster that visited this city spent its force last night. The earthquake was the worst ever experienced in San Francisco. A great deal of property was damaged by the shock and a number of buildings were thrown down, but all the substantial buildings were apparently uninjured, although they were subsequently swept through by fire. The mint building, which was planned immediately following the big earthquake in 1868, was constructed with the view of resisting to the fullest extent any similar visitation. The architects planned well, for the damage done by the shock is trifling, the principal damage being confined to ruining a few chimneys. The two big smoke-stacks were cracked entirely around, a few feet above the roof, but this will be no loss even if subsequent examination should prove they ought to be taken down, for the operations here now do not require tall stacks. However, as far as appearances go, I do not believe they will have to be removed.

Within an hour after the quake flames commenced to show up in numerous places in the business district and in the poorer residence section south of Market Street covering an area of one mile by two miles. I was informed that as many as one hundred alarms were sent in a short space of time. The earthquake had broken the mains and all the water available was what was in the

RG 104 ENTRY 229
Box 244

#2.

pipes. The department succeeded in putting out some of the fires, but they were too numerous, and in a little while the fire was beyond the control of any human agency, and spread in all directions. It burned down to the eastern water-front and was stopped there with the aid of apparatus stationed along the wharves, the wide spaces there helping also to check its progress. Westward the fire took its course, being stubbornly fought by dynamiters and the crippled fire department, but no success followed their efforts for thirty-six hours, when a wide street, Van Ness Avenue, was reached. Here by dynamiting, back-firing and with the aid of the department, the fire was controlled and a large residence section saved. From Van Ness and Market another arm of the fire continued over into the S. W. part of the city, where it was headed off about a mile and a half further out. Over this area a very large residence and manufacturing district was burned out. The entire business part of the city was swept by the flames. I can learn of only large business houses which escaped; ^{two} one ^{and the other near the railroad.} was near the water-front, with the renewal of the wooden parts and windows, several of the modern buildings will be made as good as new. I hear that the stock of goods in one of these large buildings consisting of hardware and machinery was uninjured, although the lower stories were gutted, and that the large office building at the corner of Market and California Streets with its contents was safe.

The post office building had only the north end damaged by fire, and was somewhat damaged by the shock, but not sufficiently severe to interfere with its use. I am informed that the appraisers' building, now occupied as the custom house, was pretty badly scorched, but the interior was not damaged much.

RG 104 ENTRY 229
Box 244

directly

Our building was the only building in the path of the fire, after it had burned one mile, that withstood the attack. Everything around us was destroyed, and it was only by the heroic conduct of the men that the building was saved. Some two or three years ago it occurred to me that we ought to be equipped with fire apparatus so to be able to put out any blazes that might start in the building, never thinking of its application against an attack from the outside, and it is wholly due to the furnishing of that equipment that the mint was saved. After the earthquake about 50 employees reported at the mint, which includes the watchmen who had been on duty during the last watch. The fire had reached fifth and Mission Streets before I could get to the building, but Mr. McLaughlin ^{Superintendent of Machinery} and Capt. Hawes had proved equal to the emergency and were making a grand fight against the flames. I had to make a wide detour, ^{on foot} going around the north side of the city and working my way through the guards to reach the building. Upon arriving at the mint I found our greatest danger would be when the fire worked around to the north side, so I immediately distributed the men on the various floors from the basement to the roof, and had all inflammable stuff removed to the other side of the building, the shutters closed on the lower stories and lines of hose ready to put out the fires if they should appear in the building. We had considerable lumber upon the roof where we had been making new tanks. The old tanks had been taken down and sawed up into fire wood and had been thrown off into the court, making a rubbish pile there which subsequently was a great menace to the building. Lieut. G. R. Armstrong, 6th Infantry, was here with a detail of soldiers, and his men as well as himself were very active with their assistance.

E-229

Bx 244

When the big buildings to the north of us on Market Street caught they sent terrific showers of burning material over the mint. It came down into the court as thick as hail, in pieces from the size of a walnut to the size of a man's hat, and I had two streams from the basement busily occupied in extinguishing flames started by these flakes of fire. The roof, you can imagine, was a pretty warm place. Mr. McLaughlin, with head melter Kennedy, assisted by Autzen, Terry and some of the soldiers, remained there to the end. After the danger was over they came down, blistered with heat and so blinded with the smoke they could hardly see.

The basement and refinery floors gave us the hardest battle to save. The fire would creep in behind the shutters and between cracks in the basement, giving off a blinding, choking smoke and terrific heat, but the stream of water handled by workmen Cuneo and Fredrichs, aided by J. C. Hansen, baffled the fire in that quarter.

On the refinery and adjusting room floor another lot of heroic fellows, Chittenden, foreman Bierce, Hastings, Hammill, E. Fisher, McCabe, French, Butler, Sherman, Mackie, Leith, assistant assayer Martin, Toner, Currier and Jacobs, headed by Captain Hawes, fought the fire with buckets and two streams of water. With blistered hands and faces they stood their ground, being driven back time and time again. At one time the smoke was so thick and choking they were driven to the extreme south end, or assay part, of the building, but I had some windows on the east side opened which gave them a little fresh air, and back the boys went at it again. Getting another stream of water with a greater head we found that we were able to control the situation, and that the flames could get no foothold upon the mint.

E-229
B4 244

#5.

On the main floor were foremen Healy and Kearney, Aitken, Collins, Lowrie; assistant coiner, Pedlar, Pollock, Sheridan and Tuttle. At other places were Montgomery, Kelly, Benston, C. Baker, watchmen Steere, McKee, Brooks, E. L. Miller, Zeith, and W. H. Williams and Adney. Carpenters Mix and Hope were equally active in giving their aid.

I want to make special reference to the thoughtfulness, capacity and bravery of engineer Brady, who, as soon as he saw that the fire was reaching large proportions, examined the fire pump, and, finding that the earthquake had broken a connection short off, quickly repaired the break and saw that everything was in order. And when the fight was at its height he rendered extra service by patching out and improvising an extra length of hose, which was of great value in fighting the fire in the court.

While the contest was going on at the mint the homes of several of these men were being burned to the ground, but they never called attention to the fact or asked to be relieved until danger to the mint building was over. Moreover, it is a question if the mint had caught fire whether the brave fellows on the inside could have got away in safety or not. Their only retreat would have been down streets, both sides of which were still lined with heated and blazing ruins, but they did not think of that. A great number of other employees did their best to reach the mint building, knowing that their services were needed, but they were driven back by the cordon of soldiers and police who would not listen to their entreaties to gain the mint.

The damage by fire to the building was wholly confined to the flaking off of the sandstone and granite on the north side where the flames rolled against the building and where the

E-229

Box-244

#6

nearest structures were located, and the burning out of the window sash and casing of all the windows on the north side and many on the rear. The carpet in the adjusting room is the only loss to be recorded on the interior of the building. It was ruined by water and the sparks that came in in sheets through the windows after the glass and sash had been burned away.

I have wired you that I did not think it advisable to attempt the resumption of coinage operations until after settlement, in view of the fact that it will be so near the time when you wish to begin settlement before we could get power to drive the machinery or gas for fuel purposes. In the meantime the spare space in the mint can be utilized by a clearing house and the sub-treasury. Selby's propose to turn over all their deposits to us until they can get fixed up to receive again. I have telegraphed to Denver and to Los Angeles for portable coke cupelling furnaces, which I hope to receive by the middle of the week. Upon the receipt of these I will be able to receive and assay deposits. As there is no gas we cannot run our present assay cupelling furnaces. I would have written you before, and have made the attempt nearly every day, but I could not make any headway owing to the great demand upon my time and presence in various parts of the building. I would suggest to you that you recommend the purchase of additional ground to the north of the mint, so there will be a wider space between the building and the buildings that will be reconstructed on that side of the mint. I would say we ought to have at least 50 feet on the north side and 20 feet on the rear, and then with shutters on the windows and a good fire apparatus inside we would be safe against future fires.

RG 104 ENTRY 229
Box 244

The only chimneys that were seriously wrenched on the mint building were those surmounting the wall around the court, the foundation of which had been undermined some years ago by a faulty sewer. This was discovered when I was excavating the boiler room for the new boilers. ^{two years ago} Government architect Roberts saw that it was a very serious matter and immediately took steps to reinforce the foundation. The lack of a solid foundation like the rest of the walls was made apparent in the results of the shock to the building the other day. It seems to me that here the architects can find a lesson for the construction of future buildings.

With kind regards, I am,

Yours truly,

Frank A. Beach

Superintendent.

My men report that all fires have been extinguished except in one or two isolated places near the north water front. There were wild rumors last night of destruction of docks along water front but they have been saved from fire all around city. Water traffic will not be interrupted. Am informed two or three banks will be able to resume business in city early next week. People are in ~~most~~ calm condition and in many cases have commenced clearing away to start business anew. No suffering weather grand.

Relief coming along in good shape. Will be necessary to continue this for some little time. We can accommodate at least two banks until we can resume coinage. Best thing department can do for banking interests is to make prompt and free transfer of funds through this institution against money deposited in New York

April 26, 1906.

Hon. Geo. E. Roberts,
Director of the Mint,
Washington, D. C.

Sir:

In reply to yours of the 21st inst., in relation to the date of settlement, I would suggest that we fix the 15th of June as the time for commencing. This will enable us to get through by the end of the month, and will avoid the closing down of the institution for any length of time, as it would do if we commenced on June first.

I heartily agree with your idea about receiving deposits during settlement. I has always seemed absurd to me that a big institution like this could not receive deposits right through settlement, and in the past I have done so with the exception of possibly four or five days, but with your authority I will have no interruption in the receipt of deposits hereafter.

Respectfully yours,

Frank A. Leach
Superintendent.

THE MINT OF THE UNITED STATES AT SAN FRANCISCO,

SUPERINTENDENT'S OFFICE, April 27, 1906.

Hon. Geo. E. Roberts,
Washington, D. C.

My Dear Mr. Roberts:

We have matters at the mint in very good shape. It is a great blessing to the city that the building was preserved and the great stock of money accessible for relief and business purposes. I hardly know what the people would have done without it. The banks are timid enough as it is, and if access to our funds had been denied them it is hard to say what might have happened. Notwithstanding the scene from all directions of the mint is one of desolation so far as the buildings go, the streets present an unusual sight - teams of every description, people on foot coming and going, crowds of men at work clearing away the debris, fixing gas and water pipes, electric wires and railroad tracks - and everybody seems to wear an expression of determination and confidence in the future. There is no question but that the city will be rebuilt better than it ever was. The condition of the mint and more modern buildings shows that it is possible to build against earthquake and fires.

I have installed Asst. Treasurer Jacobs in the room known as the reception room. I cleared out the numismatic collection and furniture and supplied him with funds and he is now doing business in anticipation of supplies and money from the department. As the banks have no place in which to deposit their funds or open up for business, I suggested that they wire the department for authority to use such rooms, vault and premises in the mint as I could give them. I suggested that each bank leave its funds here and between them organize a force of tellers and bookkeepers to pay out the money in

R6104 ENTRY 229 Box 244

such sums as may be needed, they receipting to me for the whole amount of the transfers; in other words, that we install here a bank for all the banking institutions that have large transfer funds. This idea met with hearty approval, and I suppose you will hear from them in the due course of time.

Secretary Metcalf was here this morning, and upon his return will probably tell you what he has seen. I pointed out to him the advantage of purchasing additional space around the building, especially on the north side, and the advisability of having iron shutters all around on the inside of the third story windows. We are in full blast so far as receiving and assaying deposits is concerned, but we cannot resume coinage operations until we receive a supply of gas for fuel purposes. Our electrician, Mr. Marshall, under the supervision of Mr. McLaughlin converted one of our large motors into a generator the day after the fire, so we have had the building supplied now for several days and nights with electric light. After getting the inside of the building equipped with lights, Mr. Marshall constructed lights at several points around the building on the outside, being the only lights in operation in the burned district from the water front to the post office.

The mining department of the State University loaned us a couple of portable cupelling furnaces, pending the arrival of those I ordered from Denver and Los Angeles. They not only loaned the furnaces, but took the trouble to furnish transportation from the University to Oakland.

I am using a large number of the employees for watchmen, keeping a day as well as a night watch, dividing them up into three shifts of eight hours each. The rest of the force of workmen is employed in cleaning up the building and furnishing the help necessary in delivering the funds to the banks and others calling for their transfers.

RG 104 ENTRY 229 Box 244

As a large number of our employees were burned out, and the guard duty at the mint requiring many to remain here, it has been necessary to supply them with ^{Sustenance} sustenance, the greater part of which we have obtained from army headquarters, but I was obliged to purchase some things that the army people were not able to supply. The army folks furnished us with some cots and mattresses, but I had to purchase 30 pair of blankets over in Oakland. I had them sent over in some automobiles that were bringing over some stuff for the city authorities, but only ten pair of the blankets reached the mint, the other twenty pair being given to some soldiers and others who needed them. ^{I subsequently obtained more for my men}

I received a subpoena yesterday summoning me to appear before the Grand Jury at Seattle in the Adams case, but under the circumstances it will be impossible for me to leave. My presence is of more importance here in San Francisco than almost anywhere else at the present time. Moreover, they have enough evidence and facts to warrant an indictment without me, and I wish the Secretary of the Treasury or the Attorney General would telegraph to Mr. Frey the necessity of excusing me from obeying the subpoena so as to save me from contempt of court and the service of a bench warrant. My presence is imperative here until the bank arrangements are completed.

Copy
I enclose you ^a letter I received from George Adams. It is a curiosity. Kerfoot came down Monday, as he was unable to hear from his people, but he returned Thursday; and, by the way, he took a bride back with him.

Mr. McLaughlin has remained in the building nearly every night since the disaster, and he has been a most efficient aid in the work we had to do here. I know he would appreciate most heartily an acknowledgment of his services from you. The newspapers have mentioned

P6104 Entry 229
Box 244

#4.

nearly all the others who were participants in the battle we had, but in some way or other Mr. McLaughlin's name has been overlooked. He was most resourceful, courageous and untiring.

I have wired you about the blasting for the purpose of throwing down unsafe walls and buildings, and mentioned the additional damage that was done to the building. Mr. Roberts, representing the Supervising Architect, was here and he estimated the damage done by the blasting at \$10,000.00, I suppose for the reason that the additional damage done to the big stacks will now make it necessary for them to be removed. There would have been no necessity of taking them down if it had not been for the injudicious use of dynamite. The mint building suffered less than any of the other buildings that went through the fire in this respect. Mr. Roberts tells me that the additional damage to the post office is fully \$100,000.00, and I am told that a private building in that neighborhood that had escaped damage by the earthquake was badly shattered by the blasts that were set off right directly opposite to it. I have a piece of iron on my desk that was blown into our court yard from a blast that was set off nearly a quarter of a mile away down Market Street, also bolt heads and pieces of brick that landed on or in the building. Of course, the removal of the walls was necessary, but I am assured by mining men and engineers that the use of so much powder was not only wasteful, but unnecessarily added to the danger to lives and property. I have a man here in the mint who removed the large brick foundation of the old engine which was inside the building on the basement floor, and he blasted it out without breaking a window, and he told me that he could remove all the walls the entire length of Market Street with the powder that they used in one blast. The concussions were heavy

RG 104 ENTRY 229 Box 244

#6.

enough to blow the hats off of people standing on the top of Knob Hill, where the new Fairmount Hotel is. I know this to be true for my son was among the group when some of them lost their hats. The Signal service corps had a telegraph line in our building for the convenience of the government, but this was torn down by the blasts and they had to abandon the wire.

With kind regards, I am,

Yours truly,

Frank A. Leach

RECEIVED AT TREASURY BUILDING AND REFERRED TO:

RG104 ENTRY 229 Box 244

THE MINT OF THE UNITED STATES AT SAN FRANCISCO,
SUPERINTENDENT'S OFFICE,May 2nd, 1906.

My Dear Mr. Robert,

Yesterday I received
a dispatch from Secy. Shaw
concerning to Selby having desk
room in Oriver's office. I
inferred that the Secretary thinks
the granting of these privileges is
encroaching on the needs of the
Sub Treasurer. If so I wish you
would disabuse his mind. Mr.
Jacobs now has more ^{room} at his
disposal and more cheerful
quarters than before the fire, and
I can make more room if needed.

In relation to granting the
Banking Association temporary
quarters, The Committee came to

2

THE MINT OF THE UNITED STATES AT SAN FRANCISCO,
SUPERINTENDENT'S OFFICE,

190

consult with me as to how they
could disburse ^{the large sum of money} money to
their customers. The money was
here but there was no place to
take it, they could do nothing
unless they could pay it out
here. They wanted to draw on
me the same as if were a bank
I said that was impossible for had
neither the men or organization for
it. The result of the conference was
the arrangement now running which
for a time is called the "Clearing House
Bank". I gave them that part of the
Mint Cashiers room formerly occupied
by the warrant and consulting clerks.
Mr Sherman gave them room in his
(office)

3

THE MINT OF THE UNITED STATES AT SAN FRANCISCO,

SUPERINTENDENT'S OFFICE,

190

office so Mr Sherman was the only one to be disappointed by the arrangement. I expect the Committee to come back and if after their report to the Association the plan was to be adopted, I intended they should wire the Department for authority for use of the room, but I have not seen the Committee since, but got message Monday that they would start the bank the next day, and we have been in a whirl ever since. I take a good part of my time, about all of afternoons and days, two clerks and two type writers and the Cashier's force to handle the receipts and payments of the Treasury transfers of money.

THE MINT OF THE UNITED STATES AT SAN FRANCISCO,
SUPERINTENDENT'S OFFICE,

190

I trust you will not think I took
upon myself the authority to grant the
bankers authority to use the Mint premises
wilfully and I trust my explanation will
be satisfactory.

X I think we ought to have
an additional appropriation for
Watchmen for the ensuing year.
The amount now available only
gives me one man outside the
building at night on each shift
or watch. Under the present con-
ditions and those likely to continue
there should be six more outside
men and two inside - at least
Eight all together. I wrote Senator
Perkins I was going to suggest an

THE MINT OF THE UNITED STATES AT SAN FRANCISCO,
SUPERINTENDENT'S OFFICE,

190 .

{ increase of this allowance \$10,000, but
\$7,200 will do.

I am leaving the matter of the
Cost of additional space around
the building hunting up. There are
so many owners it will take some
time.

The Big platform scales out
in the street on which wagon loads
Men weep'd were totally destroyed.
They should be replaced as soon
as possible.

I telegraphed you Friday about
the orders coming in upon us for shipment
of New Coin and Subsidy from Ass't
Marsus. Does not this property belong
to Jacobs? He is as well fixed as we

R6104 ENTRY 229
Box 244

6

THE MINT OF THE UNITED STATES AT SAN FRANCISCO,
SUPERINTENDENT'S OFFICE.

190

are, has the men, and's familiar with
the procedure. However I don't want
it to be understood that we are thinking
any accommodation we can give the
people at this time, but they men have
at out all they can jump at. Hardly
any of us get away before 5 to 6 pm.
And if the work can be properly done by
New Jacobs no doubt he would be glad
to take them much off our hands. But
if not I can organize another Cashier
who will handle these orders and
make change.

We all feel very proud over the
exceeding high compliment you gave
us, and are glad that we ^{were able to} contribute
something to aid the community in the

THE MINT OF THE UNITED STATES AT SAN FRANCISCO,
SUPERINTENDENT'S OFFICE.

, 190

time of its distress.

What has been done about
the Special Act in the Adams
Case? It is getting late in the
day for that matter.

Yours truly,

Frank A. Finch

Shaw, Secretary of the Treasury, for his prompt recognition of the unprecedented conditions in this City, due to the recent conflagration; for his policy thereupon adopted, of affording to the Banks and people of San Francisco the facilities of the Treasury Department, in arranging for the flow of gold to and from San Francisco by means of telegraphic transfers through the Treasury; and for his placing at the disposal of the San Francisco Banks, office room and vaults at the United States Mint, at San Francisco, thus enabling them to serve the public in its hour of need during which the Bank vaults cannot be safely opened.

To Hon. F. A. Leach

RG 104 ENTRY 229 BX 244

THE MINT OF THE UNITED STATES AT SAN FRANCISCO,

SUPERINTENDENT'S OFFICE.

May 17, 1906.

My Dear Mr. Roberts

I send herewith another photo, which should have gone in the lot I sent you the other day. This is a view of a westerly portion of the roof of the Mint over the Refinery. The portion where burned through was not covered with copper but was laid with asphaltum and fine gravel. It was originally covered with copper but some years ago it was destroyed by acid fumes from the refinery. Quite a section of the roof shown in the foreground of the photo will have to be replaced as it is burned out underneath. The great mass of red hot rubbers that banked up on the roof then against

THE MINT OF THE UNITED STATES AT SAN FRANCISCO,
SUPERINTENDENT'S OFFICE,

190 .

the low brick wall shown in the view ignited the wood work supporting the roofing or copper. There were several places where the cinders banked up, but did not do so much damage, over hose streams being more effective. These burning cinders came in a perfect shower for a long time and the men on the roof had to crouch behind the tanks and chimneys, fight the fire off one another, off the hose as well as the roof. By Asst Press reporter of Secretary Metcalf's report to the President I see that he says that it was the fire proof character of the Mint Building that saved the building. I think if he had been on that roof ten seconds during

RG104:ENTRY 229 Box 244

THE MINT OF THE UNITED STATES AT SAN FRANCISCO,

SUPERINTENDENT'S OFFICE,

, 190 .

the heat of the fire, or on the floor below where the flames of the burning building across Ninth Ave came in through the burned out windows seizing on the furnishings and fixtures, or in the basement where the stifling smoke from the great piles of burning bedding and furniture which had been placed along the building there early in the fire for safety, he would have been willing to think, that those brave fellows who stood up to the fight while their faces and clothes were scorched, had contributed something towards preventing the building being added to the list of "fire proof" shells now landmarks in the field swept by the fire. If he was correctly reported,

26104 ENTRY 229 BX 244

THE MINT OF THE UNITED STATES AT SAN FRANCISCO,
SUPERINTENDENT'S OFFICE,

190

which I doubt, I am sure he did not intend to detract ^{anything} from the credit belonging to the new, but was using the escape of the building to illustrate a point he was making about construction of the new city, and in that he was right, if the building had been less "fire proof" nothing that could have been done here would have saved it.

We are all pretty busy still, State's machine is thumping from morning until night, and that is why I have written this instead of dictating it, writing "between times".

I think we will get rid of the bank in a week or ten days. The Relief fund business promises to be

THE MINT OF THE UNITED STATES AT SAN FRANCISCO,

SUPERINTENDENT'S OFFICE,

190

greater business we have in the building, The details are growing daily, but I guess when the banks getting started that can be turned over to them. Jacobs and the Sub Treasury business are now done in their groove and things are running most pleasantly, He will have to run our Restaurant for the balance of the month but that is self supporting and is well managed by Foreman Kearney of the press room with his corps of cooks, volunteers from other departments. - We are getting the most needed windows rapidly replaced, and the building is comfortable again. With kind regards
Yours truly, Frank A. Beach

My Dear Mr. Roberts:

Yours of the 21st inst., enclosing copy of my telegram of April 18th, received. In reading it over I see that the telegraph company made quite a blunder in the transmission of my dispatch. It should have read, "we fought the fire with our own fire apparatus and without any help from the fire department." I see that when it reached you the telegram made it appear that we had the assistance of the fire department. It was a physical impossibility for any assistance to have been rendered us from the outside of the building, even if it had been available.

Yours truly,

Frank A. Leach

MINT OF THE UNITED STATES AT SAN FRANCISCO,

SUPERINTENDENT'S OFFICE

May 29, 1906.

Hon. Geo. E. Roberts,
Director of the Mint,
Washington, D. C.

Sir:

We have an accumulation of ready and extra base bars which we have been unable to work off in our usual refinery operations. They are about 43 in number, containing 326.95 ounces gold and 12,630. ounces silver, the gross weight being about 33,487. ounces. I asked the Selby Smelting & Lead Company if they would take the bars and return us the precious metals, retaining for themselves the base as compensation for the parting. They said that upon looking over the matter that the refining charges would amount to about \$125.00, and that the base contents would only amount to about \$40.00, which would make it necessary for us to pay some \$70.00 or over cash. Mr. Underhill, the president of the company said, however, that in view of the many favors received from your department that they would be pleased to take the bars and return us the precious metals without charge or further compensation than might come to them from the base metal.

Upon receipt of your authority to turn these bars over to the company I will notify Mr. Gorham to make the delivery.

Respectfully yours,

Frank L. Leach
Superintendent.

FAL/s

RG104

E-229 Box 244

MINT OF THE UNITED STATES AT SAN FRANCISCO.

SUPERINTENDENT'S OFFICE, June 5, 1906.

Hon. Geo. E. Roberts,
Director of the Mint,
Washington, D. C.

Sir:

Mr. Roberts of the Supervising Architect's office has secured plans showing the details of the construction of the big smoke stacks built for this mint, and a study of these plans has caused him to modify his conclusions as to what will be necessary to preserve them. We find that the stacks are reinforced for their entire lengths with iron columns thoroughly braced, and he has decided that it will be unnecessary to take them down, but that they can be repaired. It may be thought best to reduce the height to fifteen or twenty feet. The tops of the stacks are surmounted with cast iron panels and cornices, which have been more or less disintegrated by the acid fumes, and it is feared there is danger of their being shaken off or falling off while the men are at work below.

I got rid of the relief fund yesterday, having been winding up my connection with that business for the past two or three days. There was no longer any necessity of my handling these moneys after the banks resumed business, and the possibility of the near trial of Adams gave me a reason for requesting the committee to relieve me of the funds. For a time it involved almost as much work as the transfer of the moneys from the east to the banks, corporations and individuals here. The Selby people got their place on Montgomery Street fixed up so that

RG 104 ENTRY 229 Box 245

they moved from here on Saturday, and with the exception of having the Sub-treasury here we have about regained our normal condition. We cannot resume coinage operations yet for the reason that the power company has not been able to supply the electric current, although they have been promising it to us daily for three or four weeks past. In this connection I would say that it would be a good idea for us to install a medium sized generating plant which we could bring into use whenever we were cut out of power. Such a plant would not cost to exceed \$5,000.00, and possibly not more than \$4,000.00

Unless Congress provides some money with which to fix up a temporary home for the sub-treasury on its old site, we are likely to have this institution with us for several years, which is a very unpleasant thing to contemplate. Mr. Gorham is now crowded out of his office, and the receiving clerk has had to give up all his vaults for the use of the sub-treasury, and the institution crowds us in minor ways. I understand that Congress has been asked to appropriate \$30,000.00 to rehabilitate the remnants of the old sub-treasury building. I think myself this is a pretty large sum to be expended for a temporary building, but still as it would have to be used for the transaction of business for at least four years it ought to be made strong and habitable.

Yours truly,

Frank C. Ward
Superintendent.
